SUMMARY

MCA student and BCA graduate with hands-on experience in Python, Django and SQL. Built an AI-powered Smart Python IDE using Django and Ollama. Strong foundation in backend development and real-time applications.

EDUCATION

MCA, LDRP Institute of Technology & Research 2025 – 2027
GPA: 8.6

BCA, Gujarat University 2022 – 2025
GPA: 7.5

HSC, GHSEB 2022
72.27%

SSC, GSEB 2020
68.83%

PROFESSIONAL EXPERIENCE

HN Techno, Jr. Software Developer Intern 01/2025 – 03/2025 | Ahmedabad, Gujarat

- Worked on Python-based web application development and backend implementation.
- Assisted in debugging, testing, and optimizing application performance.
- Collaborated with team members to develop and maintain software modules.
- Gained practical experience in SDLC, version control, and software deployment.

PROJECTS

GenAI Smart Python IDE

- Developed an AI-powered Python IDE using Django and WebSockets; enabled real-time code execution and terminal updates, implemented efficient backend processing, debugging, and error handling, ensuring smooth performance, scalability, and improved user experience through optimized system design.
- Integrated Ollama for AI-based code generation, enhancing automation and development efficiency; optimized system performance, implemented comprehensive testing and error handling, conducted root cause analysis, and documented architecture, workflows, and features following SDLC practices to ensure scalability, reliability, and maintainability.

E-Learning Portal

- Developed a role-based E-Learning platform using Python and MySQL, enabling users to browse, purchase courses, and stream video content; implemented secure authentication, database management, backend logic, testing, and debugging while ensuring smooth performance, scalability, and structured system design.
- Developed a scalable role-based E-Learning platform enabling secure user access, course purchasing, and video streaming using Django and MySQL.

TECHNICAL SKILLS

Core Skills

Python, Java, Django,
Django Channels, MySQL,
OOP, REST APIs,
WebSockets, Git, GitHub
