Examination	University	Year	GPA / %
Master of Computer Applications (MCA)	KSV	2025-27	8.6
Bachelor of Computer Applications (BCA)	Gujarat University	2022-25	7.5
HSC	GHSEB	2020-22	72.27 %
SSC	GSEB	2020	68.83 %

PROJECTS

- **GenAI Smart Python IDE**
 - Developed an AI-powered Python IDE using Django and WebSockets; enabled real-time code execution and terminal updates, implemented efficient backend processing, debugging, and error handling, ensuring smooth performance, scalability, and improved user experience through optimized system design.
 - Integrated Ollama for AI-based code generation, enhancing automation and development efficiency; optimized system performance, implemented comprehensive testing and error handling, conducted root cause analysis, and documented architecture, workflows, and features following SDLC practices to ensure scalability, reliability, and maintainability.
- **E-Learning Portal**
 - Developed a role-based E-Learning platform using Python and MySQL, enabling users to browse, purchase courses, and stream video content; implemented secure authentication, database management, backend logic, testing, and debugging while ensuring smooth performance, scalability, and structured system design.
 - Developed a scalable role-based E-Learning platform enabling secure user access, course purchasing, and video streaming using Django and MySQL.

TECHNICAL SKILLS

- **Programming & Scripting Languages:** Python, Java
- **Frameworks & Libraries:** Django, Django Channels, NumPy, Pandas
- **Databases:** MySQL
- **cloud & Automation:** AWS, n8n
- **Web Technologies:** REST APIs, WebSockets
- **Version Control & Tools:** Git, GitHub
- **Programming Concepts:** Object-Oriented Programming (OOP), CRUD Operations, MVC Architecture
- **AI & GenAI Tools:** Ollama, Prompt Engineering, LangChain

WORK EXPERIENCE & INTERNSHIPS

- **HN Techno**, Jr. Software Developer Intern *(01/2025 – 03/2025 | Ahmedabad, Gujarat)*
 - Worked on Python-based web application development and backend implementation.
 - Assisted in debugging, testing, and optimizing application performance.
 - Collaborated with team members to develop and maintain software modules.
